Stewart Fleming – Maths Long Term Plan

		<p>triangle</p> <p>face, edge, vertex, vertices cube, cuboid pyramid sphere</p> <p>cone</p> <p>cylinder</p>
<u>Year 2 – Properties of Shape</u>	<ul style="list-style-type: none"> • identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line • identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces • identify 2-D shapes on the surface of 3-D shapes, [e.g. a circle on a cylinder and a triangle on a pyramid] • compare and sort common 2-D and 3-D shapes and everyday objects 	<p>surface</p> <p>line of symmetry</p> <p>rectangular</p> <p>circular</p> <p>triangular</p> <p>pentagon</p> <p>hexagon</p> <p>octagon</p>
<u>Year 3 – Properties of Shape</u>	<ul style="list-style-type: none"> • draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them • recognise angles as a property of shape or a description of a turn • identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle • identify horizontal and vertical lines and pairs of perpendicular and parallel lines 	<p>perimeter</p> <p>pentagonal</p> <p>hexagonal</p> <p>octagonal</p> <p>quadrilateral</p> <p>right-angled</p> <p>parallel, perpendicular</p> <p>hemisphere</p> <p>prism, triangular prism</p> <p>angle ... is a greater/smaller angle than</p>

Stewart Fleming – Maths Long Term Plan

		acute angle obtuse angle
<u>Year 4 – Properties of Shape</u>	<ul style="list-style-type: none"> compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes identify acute and obtuse angles and compare and order angles up to two right angles by size identify lines of symmetry in 2-D shapes presented in different orientations complete a simple symmetric figure with respect to a specific line of symmetry 	line construct, sketch centre reflect, reflection angle, right-angled base, square-based regular, irregular 2-D, two-dimensional oblong rectilinear equilateral triangle, isosceles triangle, scalene triangle heptagon parallelogram, rhombus, trapezium polygon 3-D, three-dimensional spherical cylindrical, tetrahedron, polyhedron
<u>Year 5 – Properties of Shape</u>	<ul style="list-style-type: none"> identify 3-D shapes, including cubes and other cuboids, from 2-D representations 	radius, diameter

Stewart Fleming – Maths Long Term Plan

	<ul style="list-style-type: none"> • know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles • draw given angles, and measure them in degrees (°) • identify: • angles at a point and one whole turn (total 360°) • angles at a point on a straight line and 1 2 a turn (total 180°) • other multiples of 90° • use the properties of rectangles to deduce related facts and find missing lengths and angles • distinguish between regular and irregular polygons based on reasoning about equal sides and angles 	<p>congruent</p> <p>axis of symmetry, reflective symmetry</p> <p>x-axis, y-axis, quadrant</p> <p>octahedron</p>
<u>Year 6 – Geometry/Properties of Shape</u>	<ul style="list-style-type: none"> • draw 2-D shapes using given dimensions and angles • recognise, describe and build simple 3-D shapes, including making nets • compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons • illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius • recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles 	<p>circumference, concentric, arc</p> <p>net, open, closed</p> <p>intersecting, intersection plane</p> <p>kite</p> <p>dodecahedron net, open, closed</p> <p>reflex angle</p>

Measurement – Position and Direction

<u>EYFS – Position and direction</u>	<ul style="list-style-type: none"> • Use everyday language to talk about size, weight, capacity, position, distance, time 	
--------------------------------------	--	--

Stewart Fleming – Maths Long Term Plan

	and money to compare quantities and objects and to solve problems.	
<u>Year 1 – Position and Direction</u>	<ul style="list-style-type: none"> describe position, direction and movement, including whole, half, quarter and three-quarter turns 	position over, under, underneath above, below top, bottom, side on, in outside, inside around in front, behind front, back beside, next to opposite apart between middle, edge centre corner direction journey left, right up, down forwards, backwards, sideways across next to, close, near, far along through to, from, towards, away from movement slide, roll, turn stretch, bend whole turn, half turn, quarter turn, three-quarter turn
<u>Year 2 – Position and Direction</u>	<ul style="list-style-type: none"> order and arrange combinations of mathematical objects in patterns and sequences use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn 	higher, lower

Stewart Fleming – Maths Long Term Plan

	and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise)	clockwise, anticlockwise right angle straight line route north, south, east, west, N, S, E, W horizontal, vertical, diagonal
Year 3 – UNIT NOT TAUGHT		
<u>Year 4 – Position and Direction</u>	<ul style="list-style-type: none"> describe positions on a 2-D grid as coordinates in the first quadrant describe movements between positions as translations of a given unit to the left/right and up/down plot specified points and draw sides to complete a given polygon 	north-east, north-west, south-east, south-west, NE, NW, SE, SW translate, translation rotate, rotation degree reflection ruler, set square angle measurer, compass
<u>Year 5 – Position and Direction</u>	<ul style="list-style-type: none"> identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed 	coordinate protractor
<u>Year 6 – Position and Direction</u>	<ul style="list-style-type: none"> describe positions on the full coordinate grid (all four quadrants) draw and translate simple shapes on the coordinate plane, and reflect them in the axes 	

Statistics - Statistics

Stewart Fleming – Maths Long Term Plan

<u>Year 1 – UNIT NOT TAUGHT</u>		
<u>Year 2 – Statistics</u>	<ul style="list-style-type: none"> interpret and construct simple pictograms, tally charts, block diagrams and simple tables ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity ask and answer questions about totalling and comparing categorical data 	<p>count, sort, vote group, set list, table</p> <p>tally graph, block graph, pictogram represent label, title</p> <p>most popular, most common least popular, least common</p>
<u>Year 3 – Statistics</u>	<ul style="list-style-type: none"> interpret and present data using bar charts, pictograms and tables solve one-step and two-step questions [e.g. ‘How many more?’ and ‘How many fewer?’] using information presented in scaled bar charts and pictograms and tables 	<p>chart, bar chart, frequency table Carroll diagram, Venn diagram axis, axes</p> <p>diagram</p>
<u>Year 4 – Statistics</u>	<ul style="list-style-type: none"> interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs 	<p>survey, questionnaire, data</p>
<u>Year 5 – Statistics</u>	<ul style="list-style-type: none"> solve comparison, sum and difference problems using information presented in a line graph complete, read and interpret information in tables, including timetables 	<p>database</p> <p>bar line chart</p> <p>line graph</p> <p>maximum/minimum value outcome</p>
<u>Year 6 – Statistics</u>	<ul style="list-style-type: none"> interpret and construct pie charts and line graphs and use these to solve problems calculate and interpret the mean as an average 	<p>pie chart</p> <p>mean (mode, median, range as estimates for this)</p> <p>statistics, distribution</p>
<u>Algebra – Algebra</u>		

Stewart Fleming – Maths Long Term Plan

<u>Year 1 – UNIT NOT TAUGHT</u>		
<u>Year 2 – UNIT NOT TAUGHT</u>		
<u>Year 3 – UNIT NOT TAUGHT</u>		
<u>Year 4 – UNIT NOT TAUGHT</u>		
<u>Year 5 – UNIT NOT TAUGHT</u>		
<u>Year 6 – Algebra</u>	<ul style="list-style-type: none">• use simple formulae• generate and describe linear number sequences• express missing number problems algebraically• find pairs of numbers that satisfy an equation with two unknowns• enumerate possibilities of combinations of two variables
